| | o Attachment file name incorrect when object specified using window path separator character ("\") instead of IFS path separator character ("/"). | | |
| 1S70003 | PID Message File Updates | 10/09/17 | |
| | o Add new application messages to message file for future enhancement. | | |
| 1S70004 | PID Upgrade RTVGSIPTF Command | 10/10/17 | |
| | o Previously, the Retrieve Gumbo PTF (RTVGSIPTF) command downloaded PTFs using the FTP protocol. Now RTVGSIPTF uses HTTP. Additionally, RTVGSIPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter. | | |
| | . | | |
| | We anticipate that some installations' networks will have problems accessing the PTF server over HTTP. On a temporary basis, RTVGSIPTF has introduced a PROTOCOL() parameter that allows you to switch back to the old FTP behavior while correcting problems with HTTP service. This parameter will ultimately be removed along with support for FTP as a transport mechanism. | | |
| | . | | |
| | COMPATIBILITY WARNING | | |
| | . | | |
| | HTTP is now the default protocol for PTF retrieval. If your network restricts HTTP access or if a proxy is required for HTTP access the RTVGSIPTF command will fail. If a proxy is required you must fill in the PROXY() parameter. Otherwise you will have to specify PROTOCOL(*FTP) while you resolve problems with HTTP access on your network. | | |
| 1S70005 | IFS New Export Added | 11/06/18 | |
| | o New function to open (create) a file based on CCSID instead of CPGID added. This facilitates control over the created file's CCSID attribute. | | |
