Installation Instructions

Restoring the new release

Read the Enhancement Summary to determine if any changes affect your installation. To install Ver 1 Rel 3 Mod 0, sign on as the security officer.

1. Verify that your machine is at OS/400 V4R5M0 or later by running:

```
DSPDTAARA DTAARA(QGPL/QSS1MRI)
```

2. Mount the distribution media in the appropriate device.
3. Submit the Restore Licensed Program (RSTLICPGM) command to batch:

```
RSTLICPGM LICPGM(2A55XL1) DEV(device-name) LNG(2924)
```

4. Enter your permanent authorization code.

Enhancements for Excel-erator Version 1 Release 3 Modification 0

What's In This Section

This section provides information on Excel-erator enhancements for the current release, notes any customer code implications, and describes where to find more information when applicable.

E-mail Capability Added

A new command, Send File Excel (SNDFEXCEL) has been added to Excel-erator. With it you can send data base files, converted to Excel, as attachments to an e-mail. See the command help for complete details.

Additionally, software and a menu to help you set up your system for e-mail have been added. See the manual for complete details.

Print Header/Footer Parameters Added

Two new parameters, Print header (PRTHEADER) and Print footer (PRTFOOTER) have been added to the Copy To Excel (CPYTOEXCEL) command. The parameters specify print header/footers placed in the generated file. See the command help for a list of special values and their meaning.

Data Decimal Errors Now Ignored

Excel-erator now tolerates data decimal errors encountered in the data. Zero is substituted and a warning message is issued.
