PTF List

```
Current PTF Listing                                       Page     1

Product ID  . . . . . . . : 2A55DMP Dumpster - Gumbo Software, Inc.
Release . . . . . . . . . : V1R6M0
As of . . . . . . . . . . : 2015/12/29

                                                   Status    Superseded
PTF ID   Description                               Date      By
-------  -------------------------------------------------  --------  -------
1P60ALL  Cumulative PTF Package Last Updated 2015/12/29
1P60001  PID Update Field Product Manager Verify           11/08/12
            o Installation verification menu option now
              specifies CHKSIG(*NONE). Since we digitally
              sign our objects but most customers do not
              install our digital certificates, the option
              gave unnecessarily alarming results. If you
              have installed our certificates, you can run a
              complete check using CHKPRDOPT ...CHKSIG(*ALL)
1P60002  IFS Path Normalization Problem                    11/08/12
            o An internal table was missing '\' code points
              for ccsids 1130, 1140, 1141, 1142, 1143, 1144,
              1145, 1146, 1147, 1148, 1149, 1153, 1154,
              1155, 1156, 1157, 1158, 1160, 1164, 1388,
              1399, 4971, and 5026. As a results, path
              normalization from '\' to '/' did not work
              correctly in these ccsids.
1P60003  SPL V7R1M0 QGSLRSC Difference Update              11/08/12
            o At V7R1M0, IBM's List Spooled File AFPDS
              Resources (QGSLRSC) api changes behavior
              with regards to missing resources. Changes
              were made in our logic to account for the
              difference in order to give the same
              results when resolving resources used by
              spooled files.
1P60004  FT2 Add CCSID Independent Open/Close              11/08/12
            o Added functions to open and close font file
              paths coded in any CCSID.
1P60005  FNT Resource Resolution Conflict Corrected        11/08/12
            o Previously, font parsing could produce errors
              or failed processing. The problem situation
              arose when identically named, but different,
              font resources were simultaneously parsed
              and the timing of the processing was unlucky.
              Luck is no longer required to get correct
              results.
1P60006  SUI WRKGSISPLF F5 Position Error                  11/08/12
            o Pressing F5=Refresh for a second time on
              WRKGSISPLF and WRKGSIOUTQ panels caused the
              panel to reposition to the top of the list.
